Features

Operations Management

Dash allows merchants to have a birds eye view over their entire operations. It will help managers better manage their stock, track sales, issue and track deliveries, and manage driver behaviour.

Comment Section

Dash will allow its stores to host all the comments left by their customers. This will enable direct interaction between stores and their customers. It'll help stores build authority. It'll help stores establish an online community and, it's a great place to get new ideas to use to keep your customers satisfied.

Virtual Point of Sale

Merchants won't need to worry about physically managing their point of sale systems as Dash automated this process for ease of use for both merchants and customers. Our virtual point of sale lets all store managers manage and checkout multiple live carts, discounts are applied automatically at checkout and, it's safe, secure and easy to use.

History & Reports

Dash managers will be able to view store sales report in detail and get a complete overview of their store's performance. Managers will also have access to all their delivery reports and all driver ratings and comments to assist with driver behaviour analysis.

Benefits

Store Management

Dash will simplify store management by having everything digitised and tracked daily. History reports will detail overall performance of every single operational aspect in each store from inventory management all the way down to customer reviews of their delivery.

Stock Management

There will be virtual stock keeping done on Dash. This can be used as an extra tool by store managers to help them with their stock ordering and tracking of product behaviour.

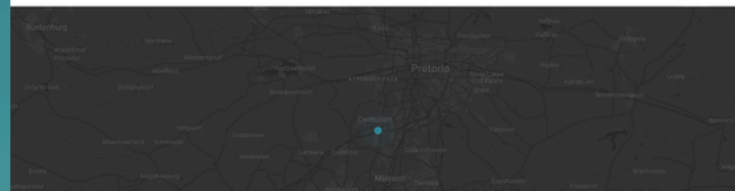

Sales Manager

With store managers being able to operate multiple shopping carts, Dash will make it easy for stores to manage all their orders, track sales and, ensure efficient delivery of all items.

Driver Management & Tracking

With real-time tracking of orders, managers will be able to assign and dispatch orders to the nearest most available driver and in turn track and manage driver location.

Our Location

Forest Hill City, Mare Rd, Monsoni, Centurion, 0157

Khomba Manager Features

Khomba Manager will enable taxi associations to improve the management of fleet and asset information from acquisition through to disposal, better manage driver and owner membership and, increase the taxi association's efficiency.

Create New Membership Accounts

The association will be able to create new membership accounts for taxi operators using their personal details.

Manage Existing Accounts

The association through an employed administrator will be able to amend driver information and owner information such as change in names, change in cell numbers or change in vehicle registration numbers. Taxi associations will also be able to notify members when their permits have expired and to upload and record permits that have been renewed.

Manage Membership Payments

The system will also enable the taxi association to monitor membership payments and identify owners who have not yet paid their membership fees.

Route Planning & Monitoring

By digitizing and mapping out routes, associations will better utilize and manage routes which will in turn support their fleet management decisions, minimize fuel consumption while simultaneously increasing productivity.

Khomba Manager Features

Khomba Manager will enable taxi associations to improve the management of fleet and asset information from acquisition through to disposal, better manage driver and owner membership and, increase the taxi association's efficiency.

Improve Fleet Safety

Together with Khomba Move, taxi associations will be able to track in real-time where each of their registered vehicles are, monitor their geo-fenced zones and get notifications related to vehicle behaviour 24/7.

New Revenue Streams

By better managing and dispatching fleet, opportunities can be identified to generate extra revenue by utilizing vehicle downtime to serve as staff bus or parcel delivery vehicles on the vehicle's permitted routes.

Maintain Safe & Reliable Vehicles

Receive notifications regarding fleet behaviour, maintenance schedules, license or permit expiry dates and any other performance indicators to help increase vehicle lifespan, maintain customer retention rate and increase driver satisfaction.

Driver Behaviour Analysis

Working together with the Khomba Driver App, associations will be able to monitor and measure driving behaviour. By watching vehicle behaviour, feedback can be given to drivers and owners to help them correct poor habits that'll lead to highly satisfied commuters and reduce vehicle maintenance costs.

Boost Taxi Association Productivity

Khomba Manager will increase taxi association efficiency and productivity by streamlining operational hours, automating fleet reports, improving the collection, capturing and management of owner and driver information and providing the association with the necessary tools to help identify and capitalize on new revenue streams.
